

Group: LEEFO

Date: 2021-09-06

Chair: Emelie Edberg

Participants: Linus Lundgren, Emelie Edberg, Eugene Dvoryankov, Felix Edholm, Omar Sulaiman

<https://trello.com/invite/leefo1/06e14b704c42b34eaf83339b9069f4c4>

#1 Objectives

1. Decide on making a desktop app or a mobile android app.
2. Generate user stories
3. Work up preliminary GUI
4. Roles?

#2 Reports from previous meeting

Eugene, Felix, Omar and Emelie have watched tutorials on android studio.

We have decided to have a weekly set meeting with supervisor Aline at Fridays 14:15.

#3 Discussion items

1. Should we make a desktop application or a mobile android app?
2. Generate user stories
3. Should we have defined roles within the group? If so, which?

#4 Outcomes and assignments

1. We decided to make an android app. We chose this because we thought that it would be more usable to have the budget application on a portable device instead of a desktop computer so that the user can check their budget and make notes etc. on the road.
2. We have created a Trello board with several user stories as well as a document with overall features that we want the app to have with a prioritization order.
3. Discussion about roles moved to the future for now.

Assignment for all group members:

We should all start (and further) familiarizing ourselves with Android Studios and android development after this meeting.

Before the next meeting each member should sketch a preliminary GUI for the application that we can compare with each other and from those sketches decide on a common GUI.

Optional for all: Continue working on user stories

Assignment for Omar:

Add meeting protocols to github.

#5 Wrap up

Next meeting Wednesday 2021-09-08 15:15.
