

Group: LEEFO

Date: 2021-10-14

Chair and secretary: Everyone participated in leading and taking notes in this meeting

Participants: Linus Lundgren, Emelie Edberg, Eugene Dvoryankov, Felix Edholm, Omar Sulaiman

## #1 Objectives

Check up on progress

## #2 Reports from previous meeting

**Eugene:** Created a search function for transactions in list mode. The available search parameters are amount and note description.

**Felix:** Has created a BudgetGrader backend and some XML layouts. Layer on top of model scrapped after issues arising and discussion with Aline.

**Linus:** Moved functionality handling categories from TransactionModel to CategoryModel. Started working on the backend part of the streak functionality.

**Omar:** Have made it possible to have a budget goal for every category and show it in the view. What is left is to make some backend code for the implementation of the new edit category method.

**Emelie:** Created sort function. The user can choose to sort transaction list in 4 different ways.

## #3 Discussion items

How is everyone doing with their tasks? What is everyone's next step?

## #4 Outcomes and assignments

**Felix:** Implement fake IDatabase in test setting after discussion with Aline on how to solve database testing problem. Also split tests to work with refactored TransactionModel. Create fragment classes etc. for budget grading.

**Linus:** Continue working on streak functionality. Finish backend and start work on front end.

**Eugene:** UML diagram for the newest model package. Fragment classes need better header comments like SingleCategoryFragment.

**Emelie:** When creating a new category make sure the correct option income/expense is checked. Write tests. Make filter functionality?

**Omar:** Work on making it possible to edit the category's budget in the view. Maybe do some exception handling stuff too

## #5 Wrap up

Next meeting monday 2021-10-18 10:00
